

## Exciting and Unique Work Opportunity

It's amazing what **Fundy Engineering's Team** has achieved over the last 30 + years!

Help shape and create our next 30 years and **join us today.**

Civil / Geotechnical Engineer

Saint John, New Brunswick

This awesome hands-on position lends itself to someone who enjoys working collaboratively in a dynamic and enthusiastic team environment. You will work on new and exciting projects in a variety of work streams primarily with our geotechnical, civil, and survey engineering teams. A major component of the position will be establishing excellent communication and rapport with clients, colleagues, contractors, supervisors, and other professional disciplines. You will report to our geotechnical and survey team director who will be your mentor and provide technical support expertise for the projects you are working on. You will be responsible for supervising several direct reports who will work closely on your projects.

Your key responsibilities will be:

- Providing engineering design and support from concept to construction
- Developing, directing, and implementing field programs and assisting with various field programs
- Developing scopes of work, cost-estimates, contracts, and work coordination
- Collecting, analyzing, and interpreting field data for building foundations, roads, and other engineered structures
- Reviewing technical documents and drawings generated by your team and providing feedback based on your knowledge and expertise
- Writing technical reports
- Mentoring junior employees

- University graduate with a degree in Civil, Geotechnical, or Geological Engineering

- 5+ years of relevant work experience

- A solid working knowledge in the application of civil / geotechnical engineering to problem solving
- Strong interpersonal and critical thinking skills
- Must possess a valid driver's licence (Class 5) and have access to a reliable vehicle
- Adhere to corporate and clients' safety policies, guidelines, and procedures

- Registration or eligibility for registration with a provincial Engineering Association (*i.e.*, *P.Eng.* registration)
- Fluency in building code and municipal zoning by-laws is also considered an asset

- We have a unique and revered corporate culture
- We offer a high level of work flexibility and an uncompromised commitment to our employees and their families
- We provide a competitive compensation, vacation package, and professional membership fee coverage
- We have a comprehensive and employee-focused health and dental care benefits program
- We offer participation in a group RRSP program
- We are committed to supporting specialized professional training and development opportunities
- We encourage and support volunteering opportunities

---

Fundy Engineering is one of the largest employee-owned, full-service, multi-disciplinary engineering-consulting companies headquartered in Saint John, New Brunswick. We primarily serve Atlantic Canada and New England, but also serve other Canadian and International markets. Our talented and award-winning staff comprises professional, technical, and support personnel who specialize in bio-resources engineering, building systems engineering (*i.e.*, electrical, mechanical, and air quality), environmental engineering, geotechnical engineering, and project management. Our multi-disciplinary nature allows our employees countless ways to learn and develop and lets us provide unique and catered solutions for our clients. We are committed to our employees and our communities, and we look forward to continuing our growth and doing awesome things!
