

Exciting and Unique Work Opportunity

*It's amazing what **Fundy Engineering's Team** has achieved over the last 30 + years!*

*Help shape and create our next 30 years and **join us today.***

Drafting Technologist

Saint John, New Brunswick

This awesome hands-on position lends itself to someone who enjoys working collaboratively in a dynamic and enthusiastic team environment. You will work on new and exciting projects in a variety of work streams primarily assisting our geotechnical, civil, and survey engineering teams. At times, there may be opportunities to work with our environmental, bio-resources, and building systems teams. You will report to our survey engineer who will be your mentor and provide technical support expertise for the projects you are working on.

As a drafting technologist, you will be assisting with:

- Design calculations
- Preparation of engineering designs and drawings
- Development of design sketches
- Preparation of construction specifications, cost-estimates, and material estimates
- Construction document packages and drawing sets
- Writing technical reports

- Post-secondary education in Civil Technology or certification in Civil 3D

- 3 years of drafting experience using AutoCAD and Civil 3D

- A strong working proficiency in AutoCAD and Civil 3D is mandatory
- Adhere to corporate and clients' safety policies, guidelines, and procedures
- Registration or eligibility for registration with a provincial Technology Association (NBSCETT) is considered an asset
- Fluency in building code and municipal zoning by-laws is also considered an asset

- We have a unique and revered corporate culture
- We offer a high level of work flexibility and an uncompromised commitment to our employees and their families
- We provide a competitive compensation, vacation package, and professional membership fee coverage
- We have a comprehensive and employee-focused health and dental care benefits program
- We offer participation in a group RRSP program
- We are committed to supporting specialized professional training and development opportunities
- We encourage and support volunteering opportunities

Fundy Engineering is one of the largest employee-owned, full-service, multi-disciplinary engineering-consulting companies headquartered in Saint John, New Brunswick. We primarily serve Atlantic Canada and New England, but also serve other Canadian and International markets. Our talented and award-winning staff comprises professional, technical, and support personnel who specialize in bio-resources engineering, building systems engineering (*i.e.*, electrical, mechanical, and air quality), environmental engineering, geotechnical engineering, and project management. Our multi-disciplinary nature allows our employees countless ways to learn and develop and lets us provide unique and catered solutions for our clients. We are committed to our employees and our communities, and we look forward to continuing our growth and doing awesome things!
