## Senior Geotechnical Engineer

### Exciting and Unique Opportunity

It is remarkable what **Fundy Engineering Employee's** have achieved over the last 30 plus years, **JOIN US!** and help us build the next 30 years.

Established over thirty years ago and now many thousands of projects later, our engineering expertise and experience continues to grow. We are providing excellence with the multi-disciplinary engineering and business support work we do for our clients we serve, throughout Atlantic Canada, as well as other Canadian and International communities.

**As part of our ongoing growth and success we are pleased to be advertising for a key and critical position of SENIOR GEOTECHNICAL ENGINEER within our Geotechnical Engineering department.**

This comprehensive technical and practical Senior Geotechnical Engineering position lends itself to someone who enjoys overseeing multiple projects from the design stage to the execution stage of priorities. Naturally a major component of this position is establishing excellent communication and rapport with clients, colleagues, contractors, supervisors and other professional disciplines to enable the successful candidate to provide solutions and clarity on all priorities including managing schedules and activities.

Working both in the office and on-site you will require significant experience and expertise with the design of deep and shallow foundations, concrete specification and testing, as well as preparing proposals, managing teams of engineers and technicians completing investigations, inspections of design and materials testing. The position will be responsible to create geotechnical reports and drawings, creating the geotechnical components of tender packages and overseeing onsite construction management and quality control activities.

Reporting to the Director of Geotechnical and Civil Engineering Services; the Senior Geotechnical Engineer position will also be responsible for collaboration on projects with Fundy Engineering's Prince Edward Island Geotechnical Office, Building Systems Department and Environmental Engineering department.

If you possess a natural and proven ability to grasp sophisticated challenges and an inherent drive to do and be the best, we would appreciate the opportunity to speak with you.

Minimum qualifications to be considered for this professional engineering opportunity are: Registered or eligible to be registered as a professional engineer within the province of New Brunswick and eligible for other jurisdictions. Ten (10) or more years experience as a Geotechnical Engineer managing independently Geotechnical Engineering projects. Naturally as part of this management and lead position at Fundy Engineering, experience and ability in the areas of, organization, communications, leadership, guidance, directing work, decision making and a passion for growth and development, need to be implicit as a natural approach to each day.

Remuneration and benefits are competitive and will reflect candidates' specific level of experience and credentials in alignment with the requirements, including, a comprehensive health care benefits program, group RRSP pension plan, commitment to specialized training & development, a high level of flexibility and an uncompromised commitment to our employees and their family. Please forward a complete portfolio/resume in confidence to [Kevin@hrondemand.ca](mailto:Kevin@hrondemand.ca) by email on or before Monday September 20, 2021.
